ABOUT THE STUDENT

S.NO	Description	Details
1.	Name of the student	ROHITH M
2.	Register Number	**7376231EE147**
3.	Department	**EEE**
4.	Year of study	**III**
5.	Contact Number	**7418568844**
6.	Mail id	**Rohith.ee23@bitsathy.ac.in**
7.	Location	**Karur**

Local Context – BPI Industry Visit (Basic Details)

Parameter	Details
Organization / Industry Name	**DAR Jewellers**
Location (City / Area)	**Sathymangalam**
Date of Visit	**02-04-2026**
Time of Visit	**04:00PM - 05:00PM**
Department / Unit Visited	**Sales, Billing and Inventory Department**
Industry Contact Persons	***Parimala (Owner)***
	Sarathy (Employee)

DAY 1 ORIENTATION, OVERVIEW & THE BIG PICTURE

BPI – SECTION 1 BUSINESS OVERVIEW & END-TO-END FLOW

1.1 Core Purpose

Product/Service	Category	Variants	Problem Solved	Customer Impact
Gold	Luxury Retail	Chains	Provides trusted jewellery for occasions and investment	Emotional value + long-term asset
Diamond	Luxury Retail	Rings	Provides trusted jewellery for occasions and investment	Emotional value + long-term asset
Silver	Luxury Retail	Bracelets	Provides trusted jewellery for occasions and investment	Emotional value + long-term asset

Category: ☐ Manufacturing ☑ Service ☑ Trading ☐ Hybrid

Additional Remarks: nil

1.2 Revenue Model

Revenue Source	Description	Pricing Method	Frequency	% Contribution
Gold Jewellery	Main sales	Based on gold rate + making charges	Daily	60%
Diamond Jewellery	Premium items	Fixed + design cost	Weekly	25%
Silver Items	Small purchases	Fixed price	Daily	10%
Repair/Exchange	Old gold exchange	Market rate	Occasional	5%

Main Revenue Driver:Gold Jewellery Sales

Additional Remarks: nil

1.3 Customer Profile

Segment	Characteristics	Needs	Source Channel
Wedding Buyers	High budget	Bridal sets	Direct visit
Middle-class families	Budget conscious	Daily wear jewellery	Walk-in
Investors	Gold buyers	Value retention	Referral
Youth	Trendy buyers	Lightweight designs	Social media

Customer Type: ☐ B2B ☑ B2C ☐ Both

Additional Remarks: nil

1.4 Department Map

Department	Role	Depends On	Outputs To
Procurement	Purchase gold	Suppliers	Inventory
Inventory	Stock management	Procurement	Sales
Sales	Customer handling	Inventory	Billing
Billing	Invoice generation	Sales	Customer
Accounts	Financial records	Billing	Owner

1.5 Single Unit Trace

Step No	Department	Activity	Input	Output	Time Taken	Waiting Time
1	Entrance / Reception	Customer enters store & greeted	Customer visit	Customer directed to sales staff	1 min	0 min
2	Sales	Understanding customer requirement	Customer need	Suitable jewellery options	3–5 mins	1 min
3	Sales	Showing jewellery items	Inventory stock	Selected items for trial	10–15 mins	2–3 mins
4	Sales	Final product selection	Customer choice	Selected jewellery	5 mins	1 min
5	Inventory	Product taken for weighing	Selected item	Weight details	2–3 mins	1 min
6	Billing	Price calculation (gold rate +	Weight + current gold rate	Final price	3–4 mins	2 mins

		making charges)				
7	Billing	Invoice generation	Product + price details	Bill	2 mins	1 min
8	Payment	Payment processing (cash/card/UPI)	Bill amount	Payment confirmation	2–5 mins	1–2 mins
9	Packaging	Jewellery packing	Purchased product	Packed item	2 mins	0 min
10	Exit	Product handover & customer exit	Packed item	Completed purchase	1 min	0 min

Additional Remarks:

Maximum time is spent in **product selection stage**

1.6 Time at Each Step

Covered in above table

Additional Remarks:

- The **maximum time consumption** occurs during *product selection*, as customers take time to compare designs.
- **Waiting time is minimal** at entry and exit but slightly higher during **billing and price calculation**.
- The process is **semi-manual**, which may increase processing time during peak hours.

- Overall, the **average total time per customer** is approximately **25–40 minutes** depending on purchase type.

1.7 Biggest Risk Point

Identify the most critical risk in the process:

Gold price fluctuation

Reason:

Direct impact on pricing and profit

Additional Remarks:nil

1.8 Most Critical Task

Identify the most important task affecting success:

Accurate billing & weight measurement

Reason:

Ensures trust and avoids financial loss

Additional Remarks:nil

BPI – SECTION 2 (ROUTINE TASKS & DEPENDENCIES)

2.1 Daily Tasks

Task	Time of Day	System/Memory	Owner	Output	Risk if Missed	Backup Available (Y/N)
Store opening	Morning (9:30 AM)	Routine / Checklist	Manager	Store ready for customers	Delay in sales	Y
Inventory check	Morning	Manual + Inventory system	Staff	Updated stock status	Stock mismatch	Y
Customer handling	Throughout day	Staff experience (Memory)	Sales staff	Customer satisfaction & sales	Lost sales	Y
Billing	During purchase	Billing software	Cashier	Invoice generated	Revenue loss	Y
Product display arrangement	Morning & Afternoon	Visual check	Staff	Attractive display	Reduced customer interest	Y
Gold rate update	Morning	Market data system	Manager	Updated pricing	Wrong pricing	Y

Cleaning & maintenance	Morning	Routine	Staff	Clean showroom	Poor customer impression	Y
Cash handling & closing	Evening	Manual + system	Cashier	Daily sales record	Financial mismatch	Y

Additional Remarks:**Billing and customer handling** are the most critical daily operations

2.2 Weekly / Monthly Tasks

Task	Frequency	System/Memory	Owner	Output	Risk if Missed	Backup Available (Y/N)
Stock auditing	Weekly	Inventory system + manual	Manager	Accurate stock record	Stock loss / mismatch	Y
Gold purchase planning	Weekly	Market analysis	Owner / Manager	Stock replenishment	Shortage of designs	Y
Sales report analysis	Weekly	Billing software	Manager	Performance insights	Poor decision making	Y
Staff perfor	Monthly	Observation + records	Manager	Improved	Reduced efficiency	Y

mance review				productivity		
Financial accounting	Monthly	Accounting system	Accountant	Profit/loss statement	Financial errors	Y
Vendor payment settlement	Monthly	Accounts system	Manager	Vendor relationship maintained	Supplier issues	Y
New design procurement	Monthly	Market trend analysis	Owner	Updated product collection	Loss of customers	Y
Maintenance & security check	Monthly	Routine	Staff/Manager	Safe environment	Theft/security risk	Y

Additional Remarks:

Monthly tasks focus on **financial management and business growth**

2.3 System vs Memory Mapping

Task	Is Documented (Y/N)	Where Stored	Access Level	Error Risk
Billing	Y	Billing software	Cashier / Manager	Low
Inventory records	Y	Inventory system + register	Manager / Staff	Medium
Customer handling	N	Staff memory	Sales staff	High
Gold rate update	Y	Market system / online	Manager	Low
Cash handling	Y	Cash register + system	Cashier	Medium
Product knowledge	N	Staff experience	Sales staff	High

Additional Remarks:

Tasks stored in **systems have lower error risk**, while memory-based tasks are more error-prone

2.4 Task Ownership

Task	Primary Owner	Secondary Owner	Approval Required (Y/N)	Escalation Path
Store opening	Manager	Staff	N	Owner
Inventory check	Staff	Manager	Y	Manager → Owner

Customer handling	Sales Staff	Manager	N	Manager
Billing	Cashier	Manager	Y	Manager → Owner
Gold purchase	Manager	Owner	Y	Owner
Cash handling	Cashier	Manager	Y	Manager → Owner

Additional Remarks:

Escalation generally follows a **hierarchical structure (Staff → Manager → Owner)**

2.5 Impact if Task is Missed

Task	Immediate Impact	Downstream Impact	Customer Impact	Recovery Time
Store opening	Store not ready	Delay in daily operations	Customers leave	1–2 hours
Inventory check	Stock mismatch	Wrong product availability	Customer dissatisfaction	1 day
Customer handling	Poor interaction	Reduced sales conversion	Loss of trust	Immediate / same day
Billing	Incorrect invoice	Financial discrepancies	Customer complaints	Few hours
Gold rate update	Wrong pricing	Profit loss / customer confusion	Loss of credibility	Same day
Cash handling	Cash mismatch	Accounting issues	Trust issues	1–2 days

Additional Remarks:

Some issues (like pricing errors) can damage **customer trust permanently**

2.6 Dependency Risk (Key Person Absence)

Task	Key Person	Can Others Perform (Y/N)	Time to Substitute	Risk Level (H/M/L)
Store opening	Manager	Y	Immediate	Low
Inventory check	Staff	Y	Few hours	Medium
Customer handling	Sales Staff	Y	Immediate	Medium
Billing	Cashier	Y	1–2 hours	High
Gold rate update	Manager	N	1 day	High
Cash handling	Cashier	Y	Few hours	High

Overall Dependency Level: ☐ High ☑ Medium ☐ Low

Additional Remarks:

- Cross-training staff can **reduce dependency risk significantly**

2.7 Handover Readiness

Task	Handover Document Exists (Y/N)	Steps Clearly Defined (Y/N)	Training Required	Time to Handover
Store opening	Y	Y	Low	Immediate
Inventory check	Y	Y	Medium	Few hours

Customer handling	N	N	High	2–3 days
Billing	Y	Y	Medium	1 day
Gold rate update	Y	Y	Low	Few hours
Cash handling	Y	Y	Medium	1 day

Additional Remarks:

Most operational tasks are **documented and easy to transfer**

BPI – SECTION 3 (LEAD & ORDER CAPTURE SYSTEM)

3.1 Inquiry Channels

Channel	Type (Online/Offline)	Volume	Handled By	Recorded (Y/N)	Risk
Walk-in	Offline	High	Sales staff	N	Missed customer preference
Phone	Offline	Medium	Reception	N	No follow-up
WhatsApp	Online	Medium	Sales team	Y	Delay in response

Additional Remarks:Most inquiries are **offline (walk-in based)**

3.2 Recording System

Channel	Where Recorded	Format (Digital/Manual)	Accessible To	Error Risk
Walk-in	Not recorded / register	Manual	Staff	High
Phone	Not recorded	Memory	Staff	High
WhatsApp	WhatsApp chat	Digital	Sales team	Medium

Additional Remarks:

Heavy reliance on **manual or memory-based recording**

3.3 Follow-up Process

Stage	Action	Responsible Person	Timeline	System Used	Miss Risk
Inquiry	Understand requirement	Sales staff	Immediate	None	Medium
Suggestion	Show designs	Sales staff	Same day	Manual	Low
Follow-up	Call/message customer	Sales staff	1–2 days	Phone/WhatsApp	High

Additional Remarks:

Follow-ups are **not structured**, leading to lost conversions

3.4 Lead/Order Tracking

Lead ID	Current Stage	Tracking Method	Updated (Y/N)	Visibility	Delay Risk
Not maintained	Inquiry/Purchase	Manual	N	Low	High
Not maintained	Follow-up	Memory	N	Low	High
Not maintained	Converted	Billing system	Y	Medium	Low

Additional Remarks:

- High dependency on staff memory → **high delay risk**

3.5 Lost Lead Evidence

Has any lead/customer inquiry been missed?

☑ Yes ☐ No

If Yes, fill below:

Case	Channel	Reason Missed	Detected How	Impact
Customer inquiry	Walk-in	No follow-up	Staff feedback	Lost sale
WhatsApp inquiry	Online	Delayed response	Chat check	Customer drop

Additional Remarks:

- Lack of follow-up leads to **direct revenue loss**

3.6 Conversion Gap

Stage	Drop-off %	Reason	Improvement Opportunity
Inquiry → Visit	20%	Lack of follow-up	Reminder system
Visit → Purchase	30%	Price/design mismatch	Better variety
Follow-up → Conversion	25%	No structured tracking	CRM system

Additional Remarks:

- Major drop-offs occur due to **lack of follow-up and tracking**

3.7 Ideal Lead & Order System

Describe ideal process flow:

Inquiry → Digital entry → Product suggestion → Automated follow-up → Conversion → Feedback

Key improvements needed:

- Implement **CRM system**
- Maintain **digital lead database**
- Automated **follow-up reminders**
- Track **customer preferences**

Additional Remarks:

A proper system can increase **conversion rate and customer retention**

BPI – SECTION 4 (STAKEHOLDER INTERACTIONS)

4.1 Owner – Biggest Risk

Owner Name	Role	Identified Risk	Why Critical	Impact Level
Store Owner	Business Head	Gold price fluctuation	Directly affects pricing and profit margin	High
Store Owner	Decision Maker	Inventory mismanagement	Leads to dead stock or shortage	High

Additional Remarks:

Owner is highly concerned about **market price changes and inventory control**

4.2 Owner – Pride vs Concern

Aspect	Pride Area	Concern Area	Reason
Product quality	High purity gold	High pricing competition	Market competition
Customer trust	Loyal customers	Customer retention	Increasing alternatives
Business growth	Brand reputation	Sales fluctuation	Market dependency

Additional Remarks:

- Major concern is **competition and price sensitivity**

4.3 Manager – Resource Constraint

Manager Name	Department	Resource Constraint	Impact	Frequency

Store Manager	Sales	Limited staff during peak hours	Delay in service	High
Store Manager	Inventory	Limited stock of trending designs	Lost sales	Medium

Additional Remarks:

- Staff shortage during peak hours impacts **customer experience**

4.4 Manager – Operational Gap

Process	Gap Identified	Cause	Impact	Suggested Fix
Billing	Delay in billing	Manual calculation	Customer waiting	Automate billing
Inventory tracking	Inaccurate stock	Manual updates	Stock mismatch	Digital inventory
Follow-up	No proper tracking	No CRM system	Lost customers	Implement CRM

Additional Remarks:

Most gaps are due to **lack of automation**

4.5 Frontline Worker – Shortcut Observation

Worker Role	Task	Shortcut Taken	Reason	Risk Level
Sales staff	Customer handling	Skips detailed explanation	Time saving	Medium
Staff	Inventory check	Rough counting	Work pressure	High

Cashier	Billing	Mental calculation	Speed	High

Additional Remarks:

- Shortcuts are taken due to **workload and time pressure**

4.6 Worker – Frustration

Worker Role	Task	Frustration	Cause	Impact
Sales staff	Customer handling	Difficult Customers	High expectations	Stress
Cashier	Billing	Repetitive work	Manual process	Errors
Staff	Inventory	Time-consuming	Manual system	Delay

Additional Remarks:

Manual processes increase **stress and inefficiency**

4.7 Unimplemented Ideas

Stakeholder	Idea	Why Not Implemented	Feasibility	Expected Impact
Manager	Barcode system	Cost	High	Reduce errors
Staff	Digital inventory	Lack of training	Medium	Better tracking
Owner	CRM system	Investment concern	High	Increase sales

Additional Remarks:

- Most ideas are feasible but limited by **cost and awareness**

4.8 Stakeholder Summary Insights

Common patterns observed across stakeholders:

- High dependency on manual work
- Need for automation
- Customer satisfaction is top priority

Conflicts between stakeholders:

Staff want easier systems vs owner cost concerns

Alignment opportunities:

Introduce low-cost digital tools

Train staff for better efficiency

Additional Remarks: nil

13.10 Comparative Insight

Compare with another similar business/process and identify differences:Organized jewellery retail chain (e.g., branded jewellery showroom)

Additional Remarks:

- Adopting digital systems can help DAR Jewellers **compete with organized retail chains**
- Even small improvements like **barcode inventory and CRM** can significantly improve performance
- Technology adoption will enhance **accuracy, speed, and customer satisfaction**

Mandatory for all (Day 1/ Day 1+2/Day 1+2+3)

BANNARI AMMAN INSTITUTE OF TECHNOLOGY
&
INSTITUTIONS INNOVATION COUNCIL

FINAL SUMMARY

Top 3 Improvements:

1.**Implement Digital Inventory System (Barcode/RFID)**

2.**Introduce CRM System for Customer & Lead Tracking**

3.Automate Billing with Live Gold Rate Integration

Conclusion:

The visit to DAR Jewellers showed a well-established business focused on quality and customer trust. However, reliance on manual processes leads to inefficiencies and missed opportunities. Implementing digital systems like inventory management, CRM, and automated billing can improve efficiency, accuracy, and overall business growth.
